1. Written consent of the patient must be obtained before the administration of a general anesthetic, deep sedation or conscious sedation, unless the dentist determines that an emergency situation exists in which delaying the procedure to obtain the consent would likely cause permanent injury to the patient. A patient should be asked to describe any current medical conditions or treatments, including, without limitation, medications, drug allergies, impending or past operations and pregnancy, and to give other information that may be helpful to the person administering the anesthetic or sedation. The dentist is not required to make a complete medical examination of the patient and draw medical diagnostic conclusions. If a dentist suspects a medical problem and calls in a physician for an examination and evaluation, he or she may then rely upon that conclusion and diagnosis. Questions asked of and answers received from the patient must be permanently recorded and signed by the patient before the administration of any general anesthetic, deep sedation or conscious sedation, and this record must be a permanent part of the patient's record of treatment.

 - (b) Writing prescriptions for controlled substances in such excessive amounts as to constitute a departure from prevailing standards of acceptable dental practice.
 - (c) The consistent use of dental procedures, services or treatments which constitute a departure from prevailing standards of acceptable dental practice even though the use does not constitute malpractice or gross malpractice.
 - (d) The acquisition of any controlled substances from any pharmacy or other source by misrepresentation, fraud, deception or subterfuge.
 - (e) Making an unreasonable additional charge for laboratory tests, radiology services or other testing services which are ordered by the dentist and performed outside his or her own office.

 - (m) The failure to obtain a patient's written, informed consent before administering general anesthesia, deep sedation or conscious sedation to the patient or, if the patient is a minor, the failure to obtain his or her parent's or guardian's consent unless the dentist determines that an emergency situation exists in which delaying the procedure to obtain the consent would likely cause permanent injury to the patient.
 - (n) The failure to maintain a record of all written, informed consents given for the administration of general anesthesia, deep sedation or conscious sedation.
 - (o) The failure to report to the Board, in writing, the death or emergency hospitalization of any patient to whom general anesthesia, deep sedation or conscious sedation was administered. The report must be made within 30 days after the event.

or practice, unless it, or another plan concurrently available to the patient, allows the patient to:

(a) Have an annual opportunity, lasting for a minimum of 30 days, to select a dentist of his or her own choice for all dental work to be performed during the subsequent 12 months. Any new patient added to the plan or practice must immediately be given an initial opportunity, lasting at least 30 days, to select the coverage supplied by the plan or practice or a dentist of his or her own choice.
