

January 10, 2021

To: Nevada State Board of Dental Examiners

From: The Nevada Dental Hygienists' Association (NDHA)

RE: Public Comment for January 12, 2021

The NDHA continues to support emergency, temporary, and legislative proposals to allow all licensed dental professionals to administer vaccines. Dental professionals have the experience and expertise to play an important role on the frontlines of improving and protecting public health through the administration of COVID-19 vaccines. The proposed emergency regulation will relieve immediate capacity constraints that will allow the state of Nevada to meet vaccination goals in a timely manner, especially in rural portions of our state.

Thank you for your time,

Antonio Ventura, RDH, BSDH
